

Darth Vader's TIE Fighter

This TIE is the prototype for the next generation of TIE fighter. Flown by Darth Vader, Dark Lord of the Sith, it has 4 engines as opposed to two, hyperdrive capability, and angled solar panels which make it more maneuverable than the standard TIE

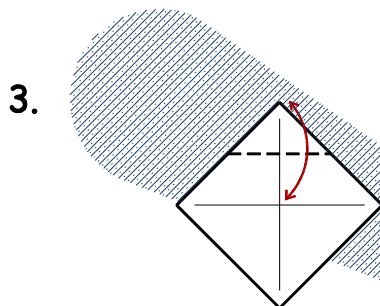

Flying this ship, Darth Vader destroyed 6 rebel starfighters in defense of the Death Star during the battle of Yavin.

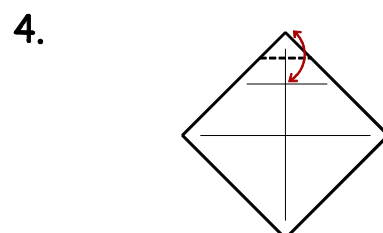

Start with a bird base, colored side down. (see page 7)

Mark fold.

Valley fold and unfold.
